### RENEWABLE ENERGY ANNOUNCES THEIR NEW CORPORATE OFFICES IN THE REGION OF DURHAM

Pickering, Ontario – Canadian energy developer Renewable Energy Management Inc. (REM) announced today the move to their new Corporate Head Office in Pickering.

The move is in response to the growth and development of their business within North America. The corporate office is ideally situated to manage their first two project sites in Ontario – just east and west of Toronto. Travel time to and from Pearson International Airport to support their international business projects is only 40 minutes and Durham Region is Ontario's Energy Capital as well as one of the leading energy clusters in North America.

Renewable Energy Management Inc. (REM) is a project development company which owns the Intellectual Property License (IP) for all of North America including; Canada, the United States and the Caribbean Territories of ENTECH Renewable Energy Solutions Ltd. ENTECH Renewable Energy Solutions are global leaders in Advanced Conversion Technology for converting waste (garbage) into 'clean' renewable energy.

The strategies and technologies address and solve the four R's of the waste management hierarchy – reduce, reuse, recycle and renewable energy.

"We are very excited about the move to our new Corporate Head Office in Pickering," said Ian Smythe, Director of Business Development for REM.

"With the current growth of REM including all of our new business opportunities the new location enables the senior management team to more effectively manage the business while at the same time work closely with our strategic partners," says Stan Kinsman, CEO and Managing Director of REM.

REM design's, builds, owns and operates Energy from Waste Facilities providing for 100% total resource utilization of waste.
